HEDGDEFONDENE & MASKINENE I OLJEMARKEDET

Det var marginale endringer i oljefuturesmarkedet frem til tirsdag i forrige uke. Hedgefondene & maskinene tok ned longs med marginale 3 mill fat, hvilket signaliserer hvor usikre de er på kort sikt. De har en lav posisjon. Det ble lagt på 15 mill. fat short og posisjonen er marginal men nok til at det kan komme oppsidemomentum hvis det kommer noe positivt. Ser ikke helt hva det skal være på kort sikt. Det er lite vi kan trekke ut av denne statistikken p.t.

BRENT FUTURES - TILBAKE TIL 2022 NIVÅER!

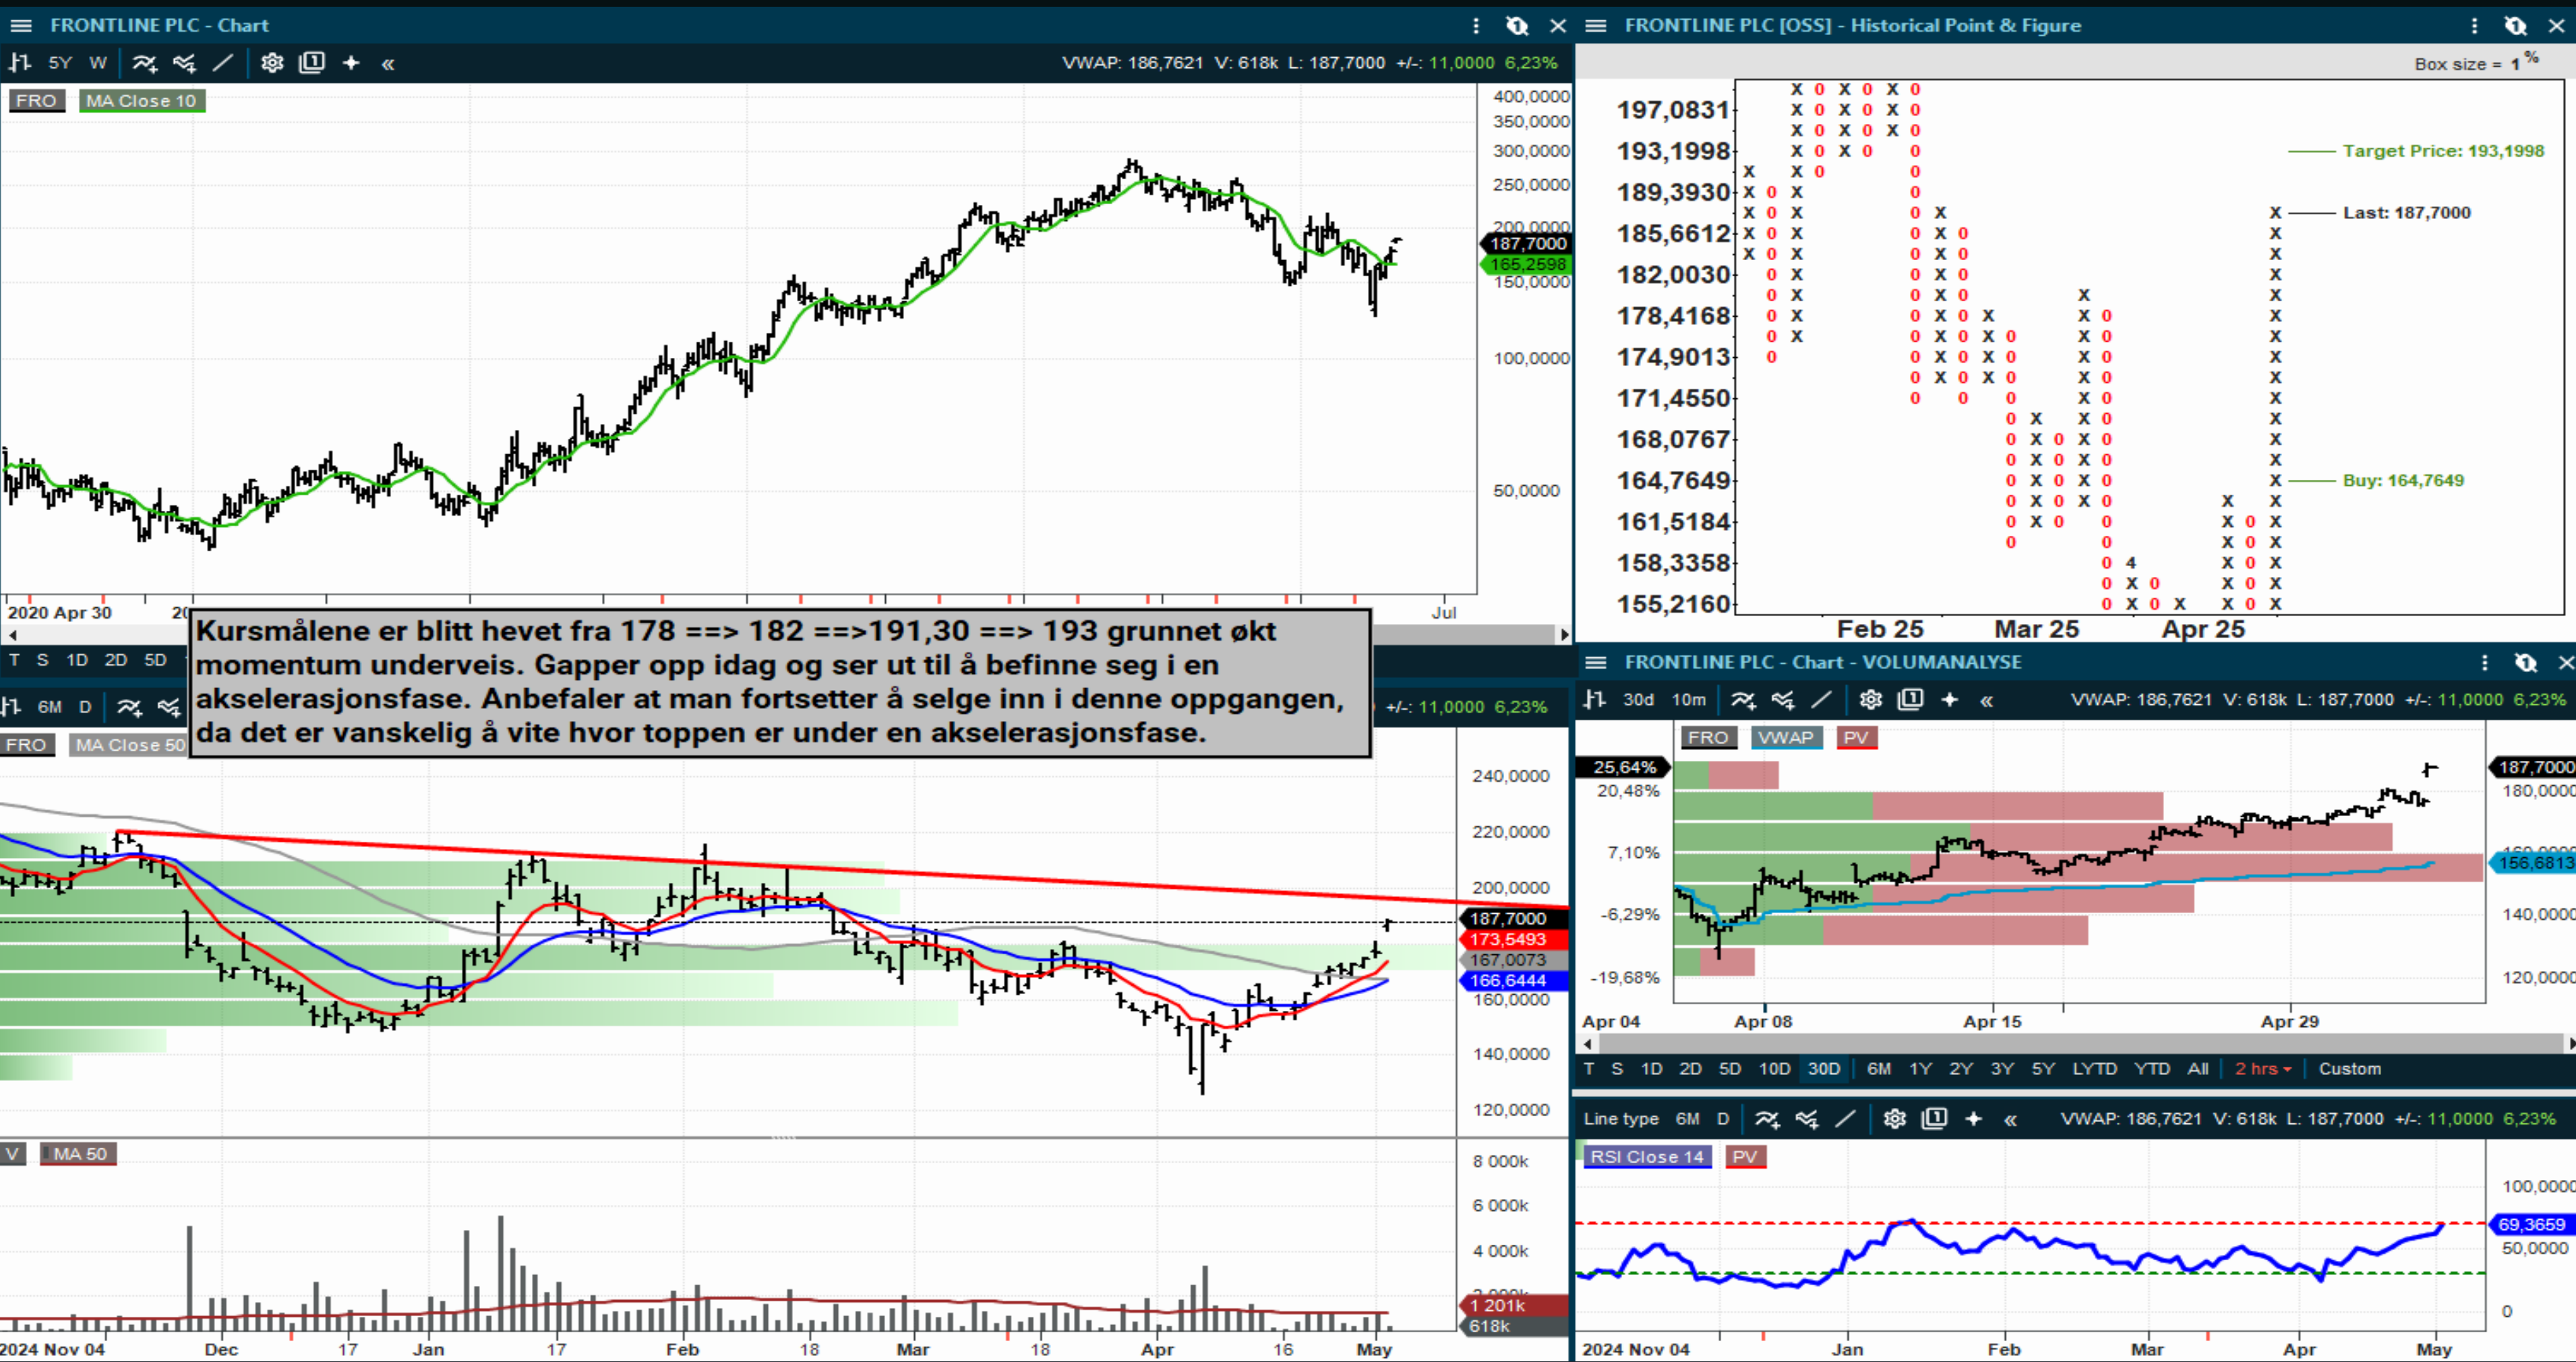

Hypotesen, som ble trukket opp i forrige uke, var at Brent skal etablere en dobbel-bunn og begynne å trende sidelengs innenfor en konsolideringsboks. Prisen falt på helgens OPEC meldinger, men har foreløpig holdt boksen. Det utløses et nytt salgssignal under 58,50, hvor kursmålet er ned mot 53. Skulle short-siden få litt blod på tann kan det ikke utelukkes at den blir kjørt videre ned. Da øker også sannsynligheten for at det kan komme en sterk short-coveringsoppgang i et marked hvor det er få long-posisjoner. Hedgefondene har en meget lav posisjonering og det å dekke shorts kan derfor bli trangt i døren. Inntil videre opprettholder jeg hypotesen om at det kan bli en dobbel-bunn og sidelengs konsolideringsboks. Men uke chartet henger i en tynn tråd!

EQUINOR - ER INVESTORER SLITNE AV Å SELGE?

AKERBP - VIL IKKE BLI PRESSET LENGRE NED ER INNTRYKKET-TALL 7/5

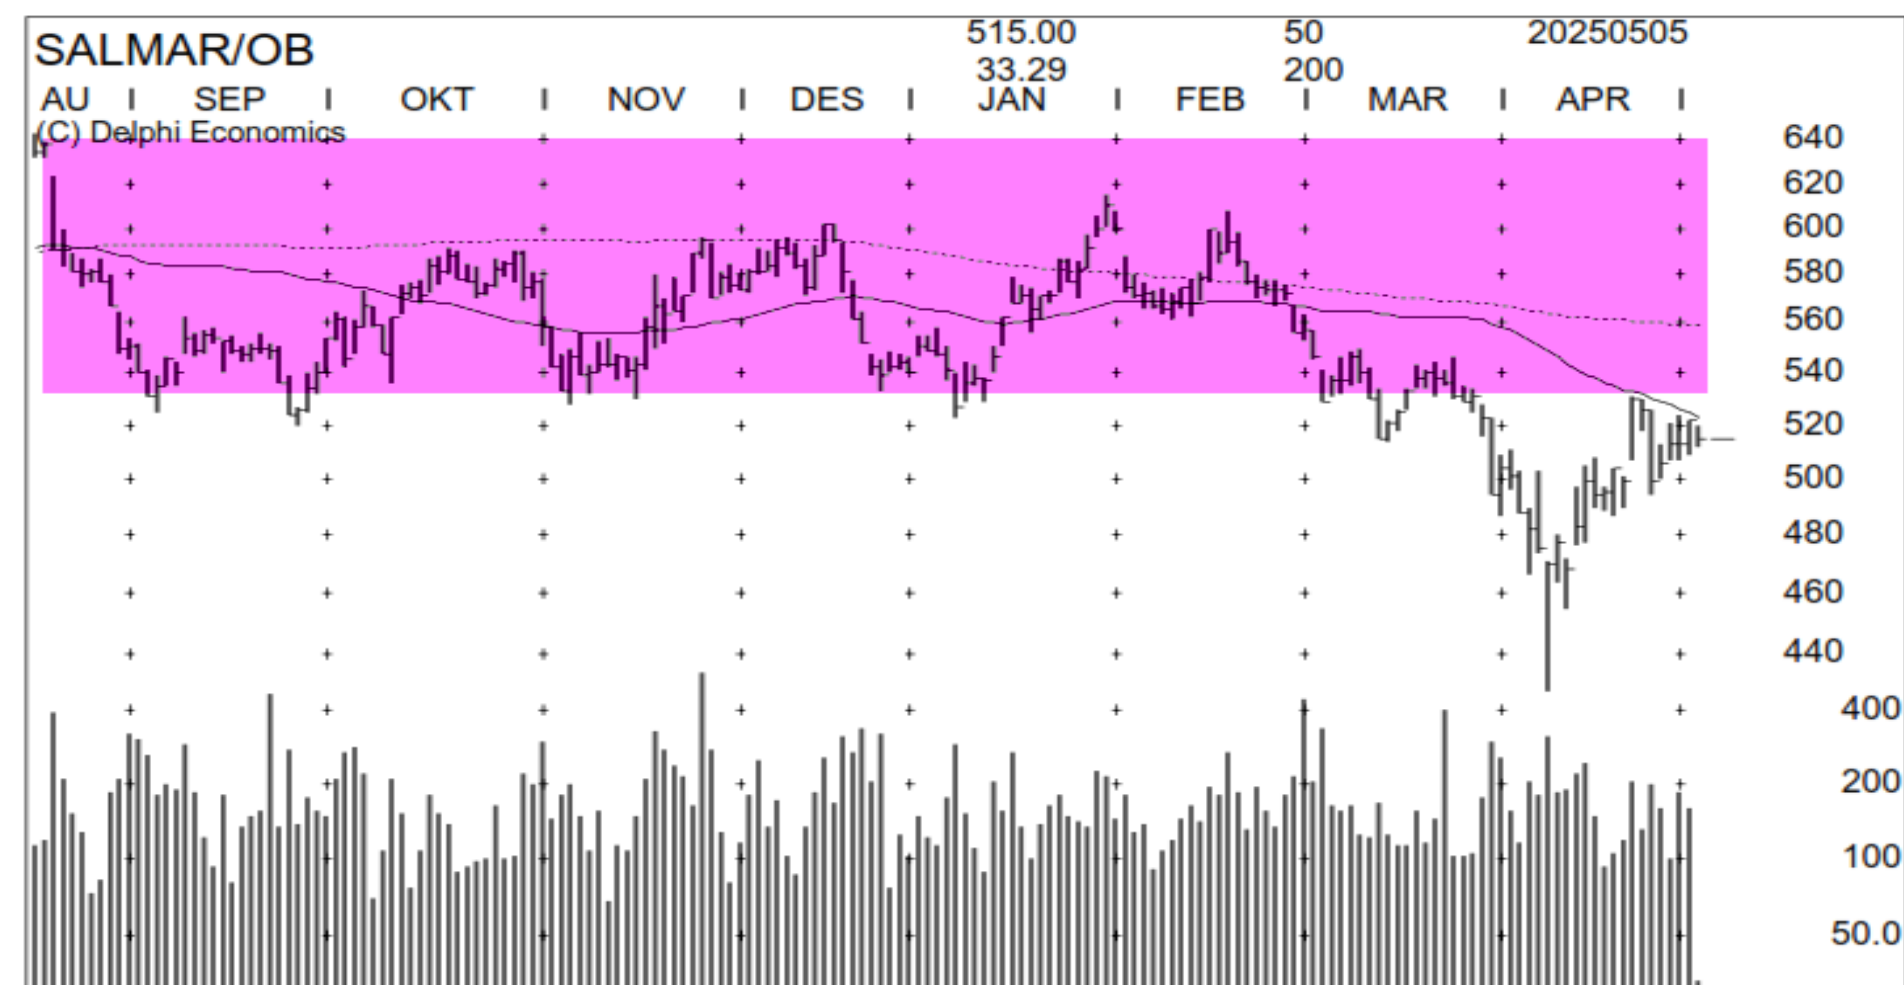

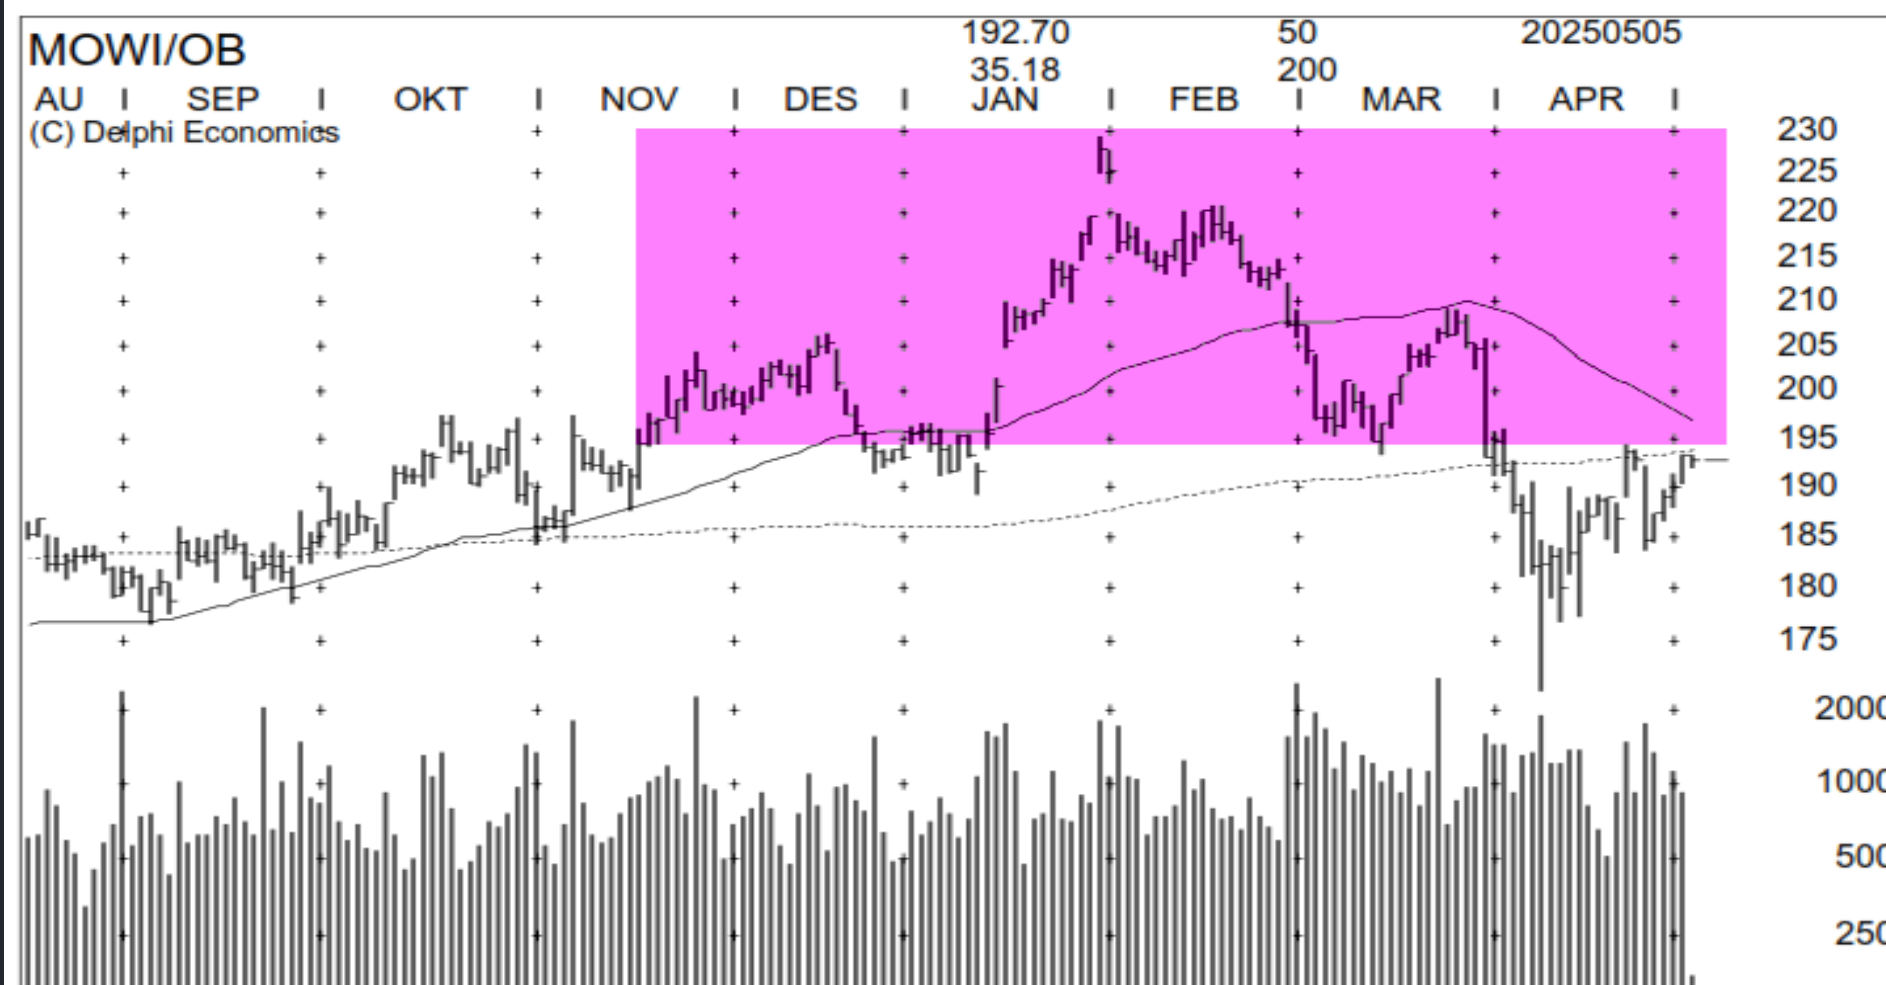

Ser litt av det samme med AkerBP, investorer er motvillige til å selge den ned. Og er det mange shorts, det er en vegg med bekymringer samtidig som den ikke vil ned, kan øke frustrasjonen på short-siden.

Har ikke noe sterkt chart, men registrerer bare noe som ser ut til å være litt unormalt. Jeg har vært negativ til sektoren, men helgens gjennomganger har fått meg inn på sporet at jeg må være åpen for alternative retninger som fortsatt sidelengs eller opp!

Ser ikke helt hva jeg skal bruke for et bull-case foruten at en rekke av de større aksjene ikke vil bli presset lenger ned.

Sier i fra hvis jeg ser noen endringer i mønsteret til oljeaksjene. AkerBP kommer med tall på onsdag og vi får se om disse kan bli en katalysator for den kortsiktige retningen.

FISK - AVVENTER NYE SIGNALER!

SMALL CAPS

Flere av mid-caps selskapene, som SATS, Norbit, Endur, Norconsult, Multiconsult, Elopak, Atea og Link er langt ut i sin oppgangsfase. De har vært langt sterkere enn forventet og har totalt ignorert tariffen. Fellestrekket er at de begynner å bli kraftig overkjøpt og har ikke noen nye signaler som man kan hive seg på. Oppgangene begynner å bli modne, men det understrekes at trenden er meget sterke. Arctic tar opp dekning av Thor Medical med kursmål 4 kroner. Dette vil kunne trigge et kjøpssignal ved 2,60, kursmål 3,17. Lavt snitt volum i denne, men dobbelt av snittet på 1,4 mill aksjer foreløpig.
